

Land Disturbance Permit

SWPPP Requirements

Permit # _____

Date: _____

Project Information.

Project Name: _____

Project Address: _____

Is the total disturbed area greater than ≥ 1 acre?: Yes No

*(If yes additional **UPDES requirements** will need to be completed and submitted with this permit, see below)*

Is this site part of a Common Plan of Development (CPoD)? Yes No

*(If yes additional **UPDES CPoD** requirements will need to be completed and submitted with this permit, see below)*

Total square feet of disturbed area: _____ Purpose of Land Disturbance Permit _____

Owner, Contractor & SWPPP Contact Information

Owners Name: _____ Address: _____

Phone Number: _____ E-mail: _____

Contractor's Name: _____ Address: _____

Phone Number: _____ E-mail: _____

SWPPP Contact Name: _____ Address: _____

Phone Number: _____ E-mail: _____

UPDES Requirements for Construction Site ≥ 1 Acre

For land disturbance activities that disturb an area greater than or equal to 1 acre.

www.deq.utah.gov/Permits/water/updes/stormwatercon.htm

Required Items for SWPPP .

- o Copy of UPDES Construction General Permit Number UTRC00000.
- o Completed copy of SWPPP CGP Template.
- o Obtain a Notice of Intent (NOI)#. UPDES Permit #: _____ Expiration Date: _____

UPDES Common Plan of Development or sale (CPoD)

Common Plan of Development or Sale is a plan to subdivide a parcel of land into separate parts for separate sale.

<http://www.deq.utah.gov/Permits/water/updes/docs/2016/02feb/fact-sheet-for-updes.pdf>

Required Items for CPoD .

- o Copy of UPDES Common Plan Permit UTRH00000
- o Completed copy SWPPP Common Plan Template
- o Obtain a Notice of Intent (NOI) UPDES Permit #: _____ Expiration Date: _____

Control Measures

The proposed control measures shall be designed to prevent or minimize, to the maximum extent practicable, the discharge of sediment, debris and other construction-related pollutants from the construction site by storm water runoff into the storm drainage system. Check each item that you will use. Many items are mandatory, Initial those to verify that you have read them and will comply.

Include additional sheets if necessary.

Initials _____ No dirt or debris placed on the roadways, sidewalk and curb (Mandatory)

Initials _____ If using chemical toilet, it must be placed minimum of 10' away from impervious Surfaces (e.g. roadways, sidewalk and curb) and secured to prevent tipping. (Mandatory)

Initials _____ Concrete washout collection containment is installed. (Mandatory)

Potential soil erosion and storm water runoff will be controlled by
 (Please check all that apply)

- Erosion control blankets Limiting area of disturbance Re-vegetation of un-stabilized area
 Check dams Silt fences Retention areas

Other describe: _____

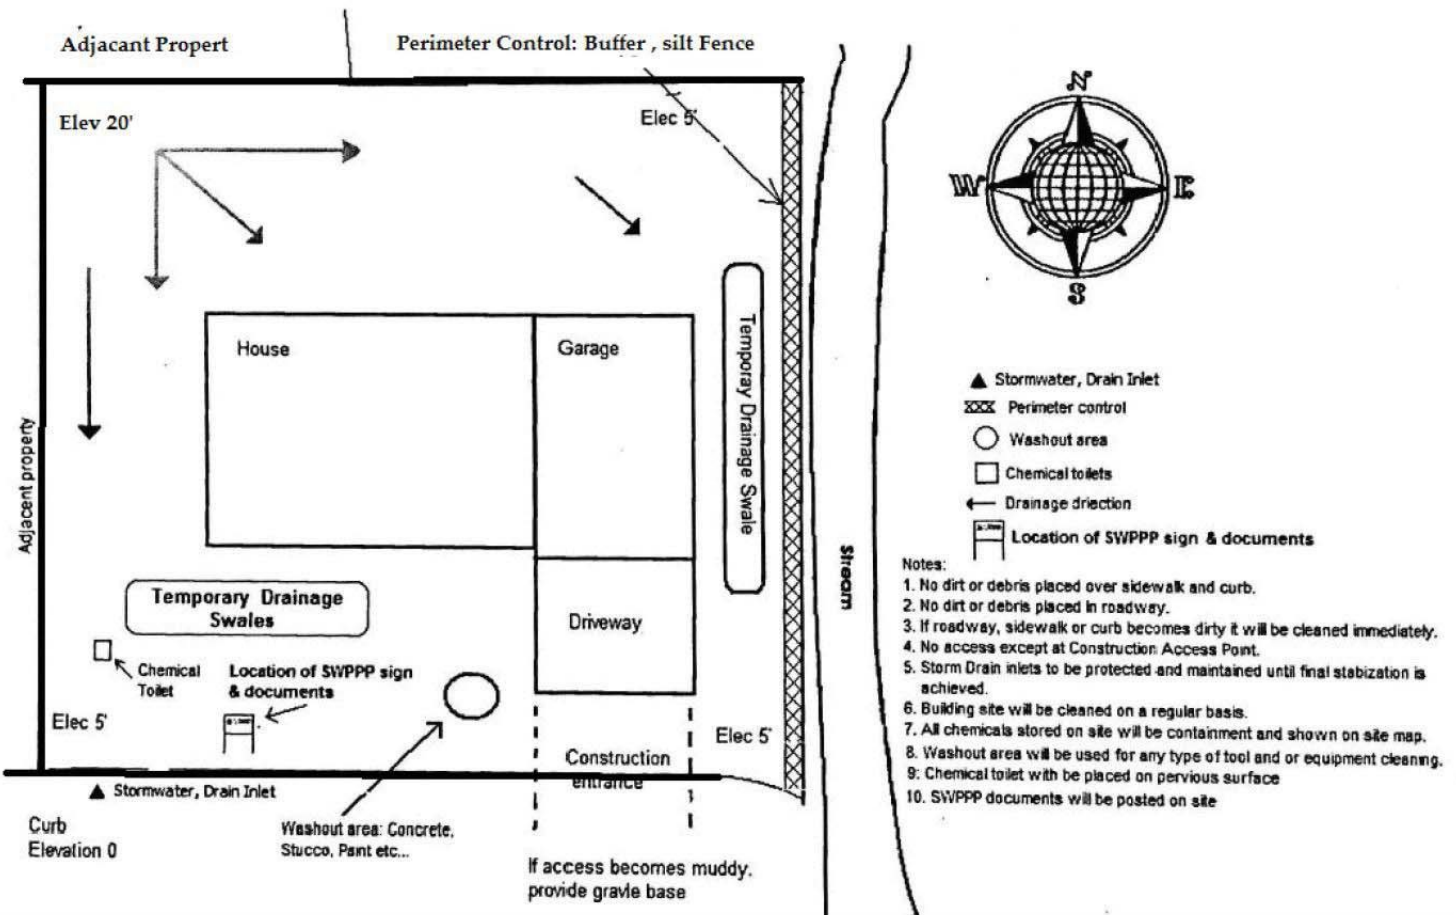

Construction Site Dewatering

State law prohibits point source discharges to a water body(ies) of the State without a Utah Pollutant Discharge Elimination System (UPDES) permit. The operator of construction dewatering or hydrostatic testing activity that has such a discharge must submit a NOI to obtain coverage under the UPDES General Permit for Construction Dewatering/Hydrostatic Testing. If you have questions about whether you need a permit under the UPDES program contact the Division of Water Quality at (801) 538-6146

Site Map

Maintain an up-to-date site maps. BMP location will change frequently as the work on a construction site progresses. Your permit requires that you keep your site map up to-date. Submit a site map with the location of these BMPs. Indicate the current location of the following:

- Portable toilets must be on pervious surfaces.
- Washout containment for concrete washout water, paint, stucco.
- Dumpsters or other trash and debris containers.
- Perimeter control & Stabilized
- Chemicals on site.
- Stockpiles
- Material storage areas.
- Vehicle and equipment fueling
- Construction entrance/exit

If a marked-up site map is too full to be easily read, you should date and fold it, put it in the SWPPP for documentation, and start a new one.

SWPPP Sign Requirements

Sign requirements for projects ≥ 1 acre or part of a common plan of development:

The permittee must post a sign. Minimum size 18"x 24" Labeled "SWPPP" with font large enough to be readily viewed from a public right away. The sign must include the UPDES (NOI) permit tracking number and operator contact name (or designee) and phone number. Sign must be installed near the main entrance to the project. Sign must have the SWPPP Documents, SWPPP map, current NOI and the Land Disturbance Permit attached or a written description of SWPPP location.

Sign requirements for projects less the 1 acre

The permittee must post a sign. Minimum size 18"x 24" Labeled "SWPPP" with font large enough to be readily viewed from a public right away. The sign must include the operator contact name (or designee) and phone number. Sign must be installed near the main entrance to the project and sign have Land Disturbance Permit attached.

Notice of Violation (NOV) & Enforcement

Whenever the City finds that a person has violated a prohibition or failed to comply with a requirement of this permit, the City will order compliance by written notice of violation to the responsible person. Such notice may require without limitation a verbal warning with corrections and/or criminal prosecution or administrative citation. Each day that a violation occurs shall constitute a separate offense.

Authorized code enforcement personnel working under the direction of the Public Works Department Director and/or Development Services Department Director are hereby declared to be Public Officials within the meaning of Section 77-7-18 Utah Code as amended, and these Public Officials are hereby authorized to issue misdemeanor citations and/or stop work order for violations of this Chapter.

Whenever necessary to make an inspection to enforce any provision of city ordinance , or whenever the City has cause to believe that there exists, or potentially exists, a condition which constitutes a violation of City ordinance, the City may enter the premises at all reasonable times to inspect the property and to inspect a copy records related to storm water compliance. In the event the landowner or occupant refuses entry after a request to enter and inspect has been made, the City is hereby empowered to seek assistance from any court of competent jurisdiction in obtaining such entry.

In addition to any criminal fines and/or penalties which may be assessed for a violation of this Article, the City shall have the right to install and/or maintain appropriate erosion and sediment control measures on any site which is required to have such measures in the event that construction activity is commenced or continued without such measures having been installed as required by this Article.

The City shall have the right to have such measures installed or maintained by City personnel or to hire a private contractor to perform such work and the contractor and/or the property owner shall be liable for any and all expenses related to performing such work plus a 25% penalty charge. The City may assess said charges against the bond posted by the contractor and/or property owner and or developer. Violators of this Article may also be subject to prosecution, fines and penalties from the State of Utah and the United States EPA.

Notice of Termination (NOT)

This Land Disturbance Permit will not be considered terminated until the Permittee submits a Notice of Termination ("NOT") to the City and the NOT is accepted by the City. The City shall accept the Notice if the Permittee has met the requirements of the Land Disturbance Permit and its ordinance. The Permittee shall keep and maintain all Permit-required improvements on the site until the City accepts the NOT. For operators that has obtained a UPDES Permit and wishing to terminate coverage, must submit a Notice of Termination (NOT) found in the addendum section in the Utah State Storm Water General Permit for Construction Activities. www.deq.utah.gov/Permits/water/updes/stormwatercon.htm

All Permittees must submit a NOT within thirty (30) days after completion of their construction activities and final stabilization of their portion of the site, or another operator taking over all of their responsibilities at the site. A Permittee cannot submit an NOT without final stabilization unless another party has agreed to and filled a Notice of Intent (NOI) to assume responsibility for final stabilization of the site.

Appropriate enforcement actions may be taken for permit violations where a Permittee submits a NOT but the Permittee has not transferred operational control to another Permittee or the site has not undergone final stabilization. If Permittee is developing the property and is planning to sell individual lots then it will be the responsibility of the Permittee to legally transfer the SWPPP portion of that lot to the new owner. The new owner will then have to obtain a new permit and implement his/her own SWPPP for that lot before the NOT will be accepted.

SWPPP Inspection Required.

Before any construction work can begin, the SWPPP must be implemented. Once the BMP's have been installed, a site inspection will be required. When submitting a NOT a final site inspection will be required. No SWPPP will be released until the area of disturbance has been stabilized.

Best Management Practices (BMP)

BMP REQUIREMENTS ARE SUBJECT TO CHANGE

BMPs are defined as "structural and nonstructural practices proven effective in sediment and erosion control and management of surface runoff into waters of the State." Eroding soils and surface water runoff transports pollutants, sediment, and nutrients into local rivers, streams, lakes and aquifers. Certain construction activities may cause more pollution if not properly managed. Not all BMPs will apply to every construction site; however, all of the suggested BMPs should be evaluated. The City may change any BMP regulation or requirement, if at any time, the City determines a BMP regulation or requirement to be ineffective and/or an additional BMP measure is deemed applicable. The City will notify project proponents of any changes to BMP regulations or requirements.

Washout/collection area: The Permittee will provide a concrete washout containment area on-site, designate specific washout areas and design facilities to handle anticipated washout water. All concrete trucks must washout in a contained collection area. Location of washout must be shown on the site map. Washout areas should also be provided for painting and stucco operations. Because washout areas can be a source of pollutants from leaks or spills. All concrete washout waste as a result of construction must be removed from the lot and properly disposed of upon completion of construction.

Off-site Sediment Tracking: Prevent sediment from being tracked off-site by stabilizing construction entrance/exit. A rock construction exit can reduce the amount of mud transported onto paved roads by vehicles. If there is not enough room for a rock construction exits then frequent street sweeping will need to be implemented.

Storm Drain Inlet Protections: Protect all inlets that could receive storm water from the project until final stabilization of the site has been achieved. Install inlet protection as soon as storm drain inlets are installed and/or before land-disturbance activities begin in areas with existing storm drain systems. Protect all inlets that could receive storm water from the construction project. Use in conjunction with other erosion prevention and sediment control BMPs.

Land Disturbance Permit

I understand that this SWPPP permit is required and will remain in effect until the entire project is stabilized, including re-vegetation and the N.O.T has been filled and accepted. All control measures will be inspected at least weekly and immediately after or during every storm event of .5 inch or more. Tracking onto roads will be cleaned up immediately. Written records of all inspections, changes to this plan, and failures of control devices will be kept. The Permittee is required to train all subcontractors, vendors, delivery personnel, and others who will be working on the site as to the requirements of this permit. The Permittee is responsible for compliance of the SWPPP for the entire site and duration of the project. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for known violations. **I understand that a pre SWPPP inspection will be needed before any work can commence and a N.O.T will be submitted when the project is finished. A Citation will be issued if work begins before Pre site inspection is conducted!**
